# Power Distribution System

The Power Distribution System simplifies wiring electronic accessories in Police and Specialty Vehicles. The PDS offers a quick and easy way to power all of your vehicle's add-on electronics and accessories including lights, radios, and MDTs; and assigns them to an "always" hot, timed, or ignition circuit. Each circuit includes its own LED warning light which identifies the blown fuse position.

## Features

- **Alternative Power Distribution System for Emergency Vehicles**  
Low cost, compact size fits almost anywhere. Measures only 11"L x 5"W x 2"H.
- **Provides up to 20 Total Circuits**  
The PDS can be configured in any combination of Timed, Battery Hot, and Ignition Switched Circuits up to 100 amps total.
- **Designed to Power your Vehicles: Radios, Emergency Lights, Siren, Video, MDT, Radar, and More!**
- **No More Dead Batteries**  
Automatically shuts off radios/computers after preset amount of time once the ignition is turned off, saving your battery. Times circuits are user Programmable from 2 minutes to 13 hours.
- **Low Voltage Automatic Disconnect**  
Automatically shuts off PDS powered equipment when voltage drops below 10 VDC.
- **Intelligent LED System**  
Automatically alerts user to which fuse is blown for quick and easy troubleshooting and replacement.
